RECOMMENDATION

Dr. Eng. Anthimos ANASTASIADIS is graduate of "Politehnica" University of Timisoara, Civil Engineering Faculty, and under my guidance, he prepared his doctoral thesis with the subject "Ductility of Steel Moment Resisting Frames", a very high standing research work.

Now Mr. Anastasiadis is the director of the ASA Structural Consultants, Thessaloniki, Greece, a very performance design office, which was a constant collaborator of my design office, especially in the field of earthquake engineering and design of steel buildings. During this co-working, I have had the occasion to remark the very high qualification of Mr. Anastasiadis in the process of steel structure designing. In the same time, this qualification is competed by a high level of responsibility in respecting the contractual obligations.

Therefore, I consider that Mr. Dr. Eng. Anthimos ANASTASIADIS is a very high qualified engineer, a very responsible co-worker and, finally, a very reliable person.

Timisoara, 26 August 2010

Director of H.I Struct Design Office
Prof. Dr. Eng. Victor Gioncu
Member of Romanian Academy of
Technical Sciences
