To whom it may concern

Subject: Letter of Reference to ASA-A.S.Anastasiadis

We collaborate with ASA-A.S.Anastasiadis for over 25 years firstly with the father Sokratis and after that with the son Anthimos in the field of surveying, compiling of contracts and technical specifications as well as control of structures and technical negotiation-arbitration.

From our collaboration I can say that ASA had an experienced team, which acts immediately and with high level of professionalism. We found ASA to be very knowledgeable and very easy to work with. They helped us to better understand a series of technical issues in order to provide a well-optimized 'product' to our clients.

From many positive attributes I distinguish the:

- Professionalism
- Sincerity
- Adaptability in law circumstances
- Ability to resolve complex problems

ASA is highly recommended from us if you need an engineering team with multilevel knowledge even in domains which are in parallel with the engineering, but with in great connection with civil engineering projects.

For the company

Sincerely yours

Spyros D. PΑPOULIDIS
